

Brand & Identity Guidelines

Overview

The BotLab Dynamics brand is pioneering change in the evolving landscape of creative technology and experiential storytelling. It represents the company's vision, values, and commitment to delivering precision-driven drone light shows that combine innovation, creativity, and scale.

A strong and consistent brand, BotLab Dynamics communicates clearly and effectively with its audiences, including clients, partners, collaborators, and the wider public. It ensures that every interaction—visual or verbal—reflects the same level of quality, reliability, and intent.

To maintain clear recognition and the highest standard of presentation, it is essential that all brand-related materials are applied correctly and consistently. These guidelines define the principles for using BotLab Dynamics' visual identity, brand voice, and supporting assets across all platforms, environments, and drone light show formats, including corporate, wedding, event, and religious applications.

Who We Are

About us

BotLab Dynamics is a Made-in-India drone technology company specialising in immersive drone light shows and large-scale aerial storytelling. With years of focused research and development, the company has established itself as a pioneer in swarm-based drone performances and controlled aerial experiences.

Operating at the intersection of technology, innovation, and precision, BotLab Dynamics delivers customised drone light shows across corporate events, wedding celebrations, cultural programs, religious gatherings, and public spectacles. Each experience is designed to balance creative expression with technical control, ensuring safety, reliability, and visual excellence.

With a strong presence across national and international platforms, BotLab Dynamics continues to expand the possibilities of drone-led storytelling by transforming the sky into a powerful and expressive medium.

Logos

Wordmark

The BotLab Dynamics wordmark is the primary and most recognizable visual identifier of the brand, representing the company across all external communications and touchpoints. It must always appear in its original, approved form and should never be altered, redrawn, distorted, or modified in any way.

The wordmark serves as the core identity across all drone light show categories, including corporate engagements, wedding celebrations, large-scale events, and religious or cultural applications. Its consistent use ensures strong brand recognition, visual integrity, and a unified presence across all platforms and audiences.

Symbol

The symbol functions as a refined secondary expression of the BotLab Dynamics brand, intended for use where the full wordmark is not feasible due to size, scale, or format constraints. It is ideally suited for applications such as favicons, social media avatars, digital interfaces, internal communications, and select branded materials that require clarity and elegance at reduced sizes.

While the symbol preserves brand recognition in minimal applications, it is not a substitute for the primary wordmark. For formal, promotional, or external-facing communications, the wordmark should remain the preferred choice unless a symbol-only application is expressly required or approved.

Overview

The BotLab Dynamics wordmark and symbol must always remain clear, legible, and unobstructed. Proper sizing and sufficient breathing room are essential to maintain visual integrity across all applications, from large-scale event branding to drone show visuals.

Minimum Size

The wordmark should never be reproduced below its minimum size. For digital use, it must not appear smaller than **300px** in **width**, and for print, not below **50mm (2")**. When these minimum sizes cannot be maintained, the symbol should be used as the primary brand identifier.

If any detail becomes illegible at reduced sizes, it may be omitted solely to preserve clarity.

Clear Space

Adequate clear space must surround the wordmark and symbol at all times. The wordmark's minimum clear space is defined by the height of a key lowercase character in the logotype. The symbol requires clear space equal to at least 100% of its total height.

The logo should never be placed within crowded compositions or constrained by other visual elements, ensuring consistent recognition and a refined brand presence.

Placement

- Logo placement must be **intentional, consistent, and aligned** with the layout hierarchy.
- The **top-right** position is preferred for strong visibility and brand recall.
- **Centered placement** is allowed for hero visuals, stage backdrops, large-scale events, drone show materials, and **minimal canvases (e.g., visiting cards)** where the logo stands alone.
- Always maintain **adequate clear space** around the logo.
- Avoid **random or unanchored placement** that disrupts visual flow.

Placement

- Use the **elongated logo** only for video formats, including **intro** (in-row) and **outro** (out-row) for strong horizontal visibility.
- Logo size should be minimum **20%** and maximum **30%** of the video canvas for proper legibility.
- In the outro (out-row), the logo must be **40%** of the screen width for strong brand recall.
- Ensure placement within safe margins and keep it clearly visible in the first and last **2-4 seconds**.
- **A subtle watermark version** (low opacity) can be used during the video without distracting from content.

Correct Usage

The BotLab Dynamics wordmark must be used only in black, or gold and placed on backgrounds that ensure strong contrast. Preferred background options include black, white, gold, and dark-toned imagery, with a strong emphasis on using dark backgrounds wherever possible.

The gold wordmark should be used on dark backgrounds, while the black wordmark may be used on white or light backgrounds. Grayscale imagery is permitted only when treated to maintain clear contrast and legibility.

Correct Usage

The BotLab Dynamics wordmark must be used only in black, or gold and placed on backgrounds that ensure strong contrast. Preferred background options include black, white, gold, and dark-toned imagery, with a strong emphasis on using dark backgrounds wherever possible.

The gold wordmark should be used on dark backgrounds, while the black wordmark may be used on white or light backgrounds. Grayscale imagery is permitted only when treated to maintain clear contrast and legibility.

Incorrect Usage

Do not stretch or skew

Do not rotate

Do not resize or modify elements

Do not place over backgrounds lacking contrast

Do not use unspecified colors

Do not add effects

Do not outline elements

Do not stack layout

Color Palette

Color Palette

Color plays a central role in establishing BotLab Dynamics' visual identity and reinforcing brand recognition. The brand palette reflects a premium, futuristic, and night-first aesthetic, aligned with the nature of drone light shows and large-scale evening experiences.

All colors must be used thoughtfully and consistently across digital, print, event branding, and drone light show applications to maintain visual coherence and clarity.

Primary Color

The primary brand color represents BotLab Dynamics' premium and technological identity.

BotLab Gold

HEX: **#DAB348**

This color is the core accent of the brand and should be used prominently for:

- Logo highlights and key brand elements
- Headings and emphasis text
- Callouts and focal visual moments
- Event branding and drone show visuals

Gold should be applied with restraint to preserve its premium impact and should never be overused as a background color.

White

HEX: **#ffffff**

White is used to provide clarity, spacing, and contrast for:

- Body text
- Content sections
- Light-background applications

Secondary colors should support the primary gold and must never dominate brand compositions.

HEX: **#DAB348**

RGB: **218 / 179 / 72**

CMYK: **0 / 18 / 67 / 15**
(approx. for print)

HEX: **#FFFFFF**

RGB: **255 / 255 / 255**

CMYK: **0 / 0 / 0 / 0**

Secondary Color

Secondary colors provide structural balance and contrast within layouts.

Black

HEX: #000000

Black serves as the primary base color for the brand and is preferred for:

- Backgrounds
- Night-time visuals
- Event branding
- Digital interfaces

HEX: #000000

RGB: 0 / 0 / 0

CMYK: 0 / 0 / 0 / 100

Typography

Typography

Corporate Typeface

Primary Typeface: Exo

Exo is the official corporate typeface of BotLab Dynamics. Its geometric and contemporary structure reinforces the brand's futuristic, technical, and corporate personality, and is available for download at <https://fonts.google.com/specimen/Exo>

Exo must be used consistently across all brand communications, including:

- Digital platforms
- Print materials
- Event branding
- Presentations and proposals
- Drone show supporting visuals

Hierarchy & Usage

A standardised sizing system ensures consistency and clarity across all applications.

Primary Headline (H1)

Exo Bold / SemiBold

Recommended Size: **36–48 pt** (Print) | **32–40 px** (Digital)

Usage: Page titles, section openers, hero headings

Secondary Headline (H2)

Exo SemiBold / Medium

Recommended Size: **24–30 pt** (Print) | **22–28 px** (Digital)

Usage: Subsections, major callouts, content dividers

Subheading (H3)

Exo Medium

Recommended Size: **18–22 pt** (Print) | **16–20 px** (Digital)

Usage: Content grouping, labels, supporting headings

Body Copy

Exo Regular

Recommended Size: **10–12 pt** (Print) | **14–16 px** (Digital)

Usage: Paragraphs, descriptions, long-form text

Caption / Footnote

Exo Regular / Medium

Recommended Size: **8–9 pt** (Print) | **11–12 px** (Digital)

Usage: Image captions, footnotes, labels, legal text

Primary Headline (H1)

Secondary Headline (H2)

Subheading (H3)

Lorem ipsum dolor sit amet, consectetur adipiscing elit.

Brand Materials

Imagery Style

Icon Style: Clean, geometric, minimal.

Imagery Style: Real drone shows, night environments, large crowds, authentic scale. Stock imagery not permitted.

Imagery Treatment: Apply subtle dark gradients for contrast in large-format visuals.

Patterns: Abstract, motion-inspired, used minimally. Applications include Website, Business Cards, Creative Posts, Advertisements, Brochures, One-Pagers, and Ebooks

Presentation

Presentations are a key brand touchpoint for BotLab Dynamics and are used for client pitches, proposals, internal communication, and discussions with corporate and government stakeholders. All presentations must reflect the brand's values of precision, innovation, and clarity.

Presentation design should follow a dark, cinematic layout, aligned with the brand's night-first visual language. Content must be concise, well-structured, and supported by high-quality visuals that enhance storytelling.

Guidelines

- Use dark backgrounds with Gold accents sparingly
- Follow the Exo typography system and hierarchy
- Use real drone show imagery wherever possible
- Maintain clear spacing and minimal layouts
- Avoid clutter and excessive animations

Approved Template

All presentations should be created using the official BotLab Dynamics template:

[Download Template](#)

Email Communication

Emailers are used for campaigns, announcements, launches, and lead generation. All BotLab Dynamics emailers must reflect a premium, cinematic, and conversion-focused visual style while ensuring compatibility across email clients.

Layout & Style

- Use dark background as primary base
- Highlight key numbers or messages using BotLab Gold
- Maintain clean spacing and single-column readability
- Use real drone show visuals only
- Keep copy concise and visually driven

Typography

To ensure consistent rendering across all email clients (Gmail, Outlook, Apple Mail, etc.), the following font usage must be followed:

- **Exo:** Used only inside static image creatives or banners within the email
- **Calibri:** Used for all live HTML text content

Calibri Light is recommended for body copy and headings in HTML emails to ensure global compatibility and prevent rendering issues across platforms.

[Download Template](#)

Static Ads

Primary Sizes

- 1080×1920 (Reels/Stories)
- 1200×628 (LinkedIn/Ads)
- 1200×1200 (Social posts)
- 1200x1500 (Rare — used for LinkedIn when required)

Design Principles

- Use dark/night background
- Drone formation must be the hero
- Keep layout minimal and high contrast
- Maintain clear spacing and hierarchy

Typography

- **Heading:** Exo Bold
- **Subheading:** Exo Medium
- **Credibility / footer line:** Exo Regular

Color Usage

- Highlight headings in **Gold #DAB348**
- Supporting text in White
- Important words may be selectively highlighted in Gold
- Do not overuse gold — use for emphasis only

Composition

- Top: Headline+Subheading
- Middle: Drone formation visual
- Bottom: CTA / credibility line
- Avoid clutter, excessive effects, or bright non-brand colours.

1200x1200

1200x628

1080x1920

- Always create and take **1200×1200 (square)** as the master design for approval
- Other sizes must be adapted from the approved master layout
- Maintain consistency across all resized formats

Category-Based Visual Identity System

(Instagram Video Covers & Social Video Thumbnails)

To ensure instant recognition across Instagram Reels, video covers, and social video content, BotLab Dynamics uses a category-based colour system for drone light show visuals. This system helps distinguish show types at a glance while maintaining a consistent, night-first brand identity.

Category colours are used as accent highlights within drone formations and should not replace the core brand palette.

Drone Light Show Categories & Colors

Corporate Programs — White

Represents clarity, precision, and professionalism. Used for corporate launches, brand storytelling, and enterprise events.

Wedding Shows — Red

Represents love, celebration, and emotion. Used for personalised visuals, couple silhouettes, and romantic storytelling moments.

Government Programs & Campaigns — Yellow

Represents unity, optimism, and national significance. Used for public messaging, commemorations, and civic events.

Events & Concerts — Neon Blue / Neon Green

Represents energy, rhythm, and modern spectacle. Used for concerts, festivals, and integrated stage performances.

Video

(Reels, YouTube, Case Studies, Event Films)

Video is the strongest brand expression for BotLab Dynamics and must maintain cinematic consistency, scale perception, and visual clarity across all categories.

These guidelines are based on the official video and references.

Corporate Shows Video

Corporate Shows | Vision Board Color Video

Maintaining a clean, structured skyline while capturing aerial drone shots, ensuring architectural lines remain balanced and unobstructed. The sky tone to stay neutral to slightly cool with bluish hues to create a professional, polished visual language that reflects corporate clarity and modernity.

Patriotic/Political Shows

Using subtle green tints with slightly darkened, dramatic skies to create a powerful, cinematic tone that evokes pride and resilience. Visual emphasis will highlight soldiers, Indian flags, and strong silhouettes, with contrast and lighting crafted to amplify honor, unity, and national spirit.
